About Me

Angular developer with over 3 years of experience in designing and delivering high-load, scalable web applications. I specialize in building complex user interfaces with advanced filtering capabilities and real-time data updates via WebSockets. I have successfully implemented performance optimizations such as lazy loading and comprehensive refactoring, which reduced application load times by 30–50%. Additionally, I enhanced application architecture and streamlined deployment processes by adopting a full-stack development approach combining Angular and Node.js.

I work closely with cross-functional teams, actively contributing ideas and solutions to ensure the delivery of robust and maintainable software. My focus is on writing clean, efficient code while maintaining alignment with business objectives.

Why choose me:
I am not just a coder—I take the time to deeply understand the underlying business challenges and focus on delivering practical, high-impact results. I excel in collaborative environments, consistently offering well-thought-out solutions and driving projects to a stable, high-quality finish. I guarantee dedication, reliability, and meticulous attention to detail throughout the development lifecycle.

Skills

- **Frontend**: Angular, Ionic, DevExtreme, Angular Material, TaigaUi, HTML, CSS/SCSS/LESS, JavaScript, TypeScript, RxJS, NgRX
- **Design**: Figma, Photoshop, Illustrator
- **Testing**: Jest, Karma, Jasmine
- **Backend**: Node.js, Express, Docker, C#, .NET

- **Tools**: Git, GitHub/GitLab, VS Code, Visual Studio, Chrome DevTools, Linux, Jira
- **API Integration**: REST APIs
- **Soft Skills**: Adaptability, continuous learning, and staying up-to-date with industry trends

Experience

Full Stack Developer – Angular/NodeJS (April 2025 – now)
Background Digital *https://background.digital/*

- Developed and enhanced an admin panel for residential complex management (e.g., vb2.ilike.ru, malahovkahouse.ru, etc.), reducing the time required to add new properties by 30%.
- Optimized real estate filtering with state preservation — improved user experience and reduced property search time by 25%.
- Implemented component lazy loading, decreasing page load times to 1.2–1.5 seconds and improving Lighthouse performance scores.Coordinated tasks via **Yandex Tracker**, participating in daily meetings for updates and issue resolution.
- Reduced image sizes by 40% without quality loss, increasing overall performance.
- Refactored and maintained the codebase to improve readability and maintainability.

Stack: Angular 16–18, TypeScript, RxJS, Node.js, Express, HTML, SCSS, GitLab CI/CD, Yandex Tracker

Angular Developer (October 2024 – May 2025)
Rick Masters *http://rikmasters.ru/*

- Developed a scalable admin panel (web + mobile version) for handling client requests and managing employee data.
- Implemented an Angular 18 architecture using design patterns (Facade, state management with RxJS), improving code clarity and accelerating feature delivery by 40%.
- Optimized large data tables by introducing debounce/throttle mechanisms, reducing CPU load by ~25% during search and filtering.
- Refactored modules with lazy loading and zoned change detection, cutting page load times by 30%.
- Built responsive layout with virtual scroll support for tables, ensuring smooth operation on mobile devices.
- Integrated REST APIs and WebSockets for real-time updates of requests and notifications — improved data relevance and reduced manual refreshes.
- Decreased support requests by 20% through UX improvements: progressive loading, interactive filters, and contextual hints.
- Collaborated in an Agile (Scrum) team: contributed to planning, code reviews, bug fixing, and UX testing alongside designers and QA engineers.

Stack: Angular 18, TypeScript, RxJS, SCSS, REST API, WebSockets, Taiga UI, HTML5, Figma, Jira

Full Stack Developer – Angular/NodeJS (March 2024 – December 2024)
Background Digital *https://background.digital/*

- Developed a Single Page Application (SPA) for residential complexes (River House, Malahovka House, 3 Red) using Angular 18, ensuring fast and responsive user interactions.
- Built interfaces from Figma designs with pixel-perfect UI/UX alignment, improving visual consistency and reducing designer revision cycles.
- Set up CI/CD pipelines in GitLab, automating build and deployment processes to minimize manual errors and accelerate releases.
- Developed REST APIs with Node.js and Express to connect frontend and backend, enabling stable and efficient data loading.
- Optimized UI performance using RxJS and responsive layouts, improving speed and cross-browser compatibility.
- Participated in Agile workflows using Yandex Tracker, planning tasks daily and synchronizing with the team.

Stack: Angular 18, TypeScript, RxJS, HTML, SCSS, Node.js, Express, Git, GitLab CI/CD, Figma, Yandex Tracker

Angular Developer (January 2023 – March 2024)
CyberiaSoft *https://www.cyberiasoft.com/*

- Migrated a legacy application from .NET MVC + DevExpress to a modern Angular + DevExtreme stack — improved UX and accelerated development speed.
- Rebuilt product editing forms with client-side validation and dynamic fields — reduced data entry time by 40%.
- Integrated REST APIs with real-time updates using RxJS — orders were refreshed live without page reloads.
- Implemented filters by status, date, and text using DevExtreme DataGrid, improving search and sorting convenience.
- Ensured responsive UI with CSS Grid and Flexbox, making the system accessible across mobile and desktop devices.
- Optimized data loading: implemented lazy loading and reduced redundant requests, cutting catalog load time from 5 to 2 seconds.
- Trained the team to work with the new system by preparing documentation and instructional videos.

Stack: Angular, TypeScript, RxJS, DevExtreme, REST API, HTML, CSS, SCSS, VS Code

Angular Developer (June 2022 – May 2023)

GeoAlphaSolution *https://geoalphasolutions.com*

- Built user interfaces for **FairContent.media** and **Swiftness** using Angular, delivering intuitive UX for e-commerce and fintech products.
- Applied TypeScript, RxJS, and REST APIs for dynamic data rendering and stable frontend-backend communication.
- Integrated Figma designs and implemented responsive layouts with HTML, SCSS, and CSS, ensuring cross-browser compatibility.
- Collaborated using GitHub: managed pull requests, participated in code reviews, and synchronized tasks with the team.
- Used ES6 and OOP principles to produce structured, extensible, and maintainable code.
- Adapted quickly to evolving requirements, shifting features, and distributed team workflows.

Stack: Angular, TypeScript, RxJS, HTML, CSS, SCSS, JavaScript (ES6), REST API, GitHub, Figma, VS Code, Visual Studio

Angular Developer (February 2022 – October 2022)

Epam - RsSchool *https://www.epam.com/*

Completed Intensive Frontend Development Course — ranked in the top 46 out of 600 participants.
Covered HTML, CSS, JavaScript, TypeScript, and Angular with a strong focus on practical skills.

- **Developed 4 training projects:**
  – BookShop
  – Shelter
  – Project Management System
  – English for Kids

Gained hands-on experience working with Figma designs, Git/GitHub, REST APIs, and RxJS in a team setting.
Used Chrome DevTools for debugging and applied modern tools and best practices for code optimization.
Earned a certificate confirming successful completion and proficiency in acquired technologies.

Stack: HTML, CSS, SCSS, JavaScript, TypeScript, Angular, RxJS, REST API, Git, GitHub, Figma, JSON, Chrome DevTools, VS Code, Visual Studio

Education

ANGULAR IN DEPTH COURSE, Frontend-development - 2024
Alte University

Bachelor of Science: Computer Information Systems – 2018-2023
Samtskhe-Javakheti State University

Angular - The Complete Guide (2022 Edition) - 2023
Udemy, Inc. - Course Author: Maximilian Schwarzmuller, Angular Development

2022 Angular. Теория и Практика 2020. Все включено + Бонусы - 2022
Udemy, Inc. - Course Author: Vladilen Minin, Angular Development

All about HTML CSS JS - 2021
YouTube channel "Фрілансер по життю" - Course Author: Zhenya Andrikanich, Frontend Development

Certifications

Angular (Basic) Certificate
HackerRank, Frontend – development *https://www.hackerrank.com/certificates/3bb4899fe321*

Angular (Intermedaite) Certificate
HackerRank, Frontend – development *https://www.hackerrank.com/certificates/6905c3d04f00*

JS/FE COURSE EN 2022 (JAVASCRIPT - ANGULAR)
The Rolling Scopes School, Frontend – development *https://app.rs.school/certificate/azjkqokx*
